

CocoMor is a coco coir fiber which is obtained from the husks of coconuts as a renewable, natural, organic and bio-degradable alternative to Peat Moss. CocoMor may be used 'as is' for indoor and outdoor plants including; lawns, trees, herbs, fruiting and flowering plants mixed with soil, as a top dressing or as a soil replacement.

- Major ingredients are Coco Coir and Coco Peat.
- 55% Fiber and 45% pith for optimum aeration.
- Does not require perlite mix for added aeration.
- Retains nutrients against leaching and will buffer supply.
- High water holding capacity and wetability.
- Excellent drainage.
- Low salt (0.25%) content – EC Anion Sum 1.3 – pH 6.04
- Resistant to rot and mold.
- Excellent moisture retention capacity.
- Retains up to 10X its weight in water.
- Quadruple washed, aged for 18-24 months and calcium buffered.
- Slow disintegration may be used for long term crops such as roses for periods longer than 10 years.
